TIBETAN IRIDOLOGY

TIBETAN IRIDOLOGY

The different kind of Eye Reading

The eyes are the mirror of the soul. They show the script for "the role you play in life." The map of this eye-reading is based on physiological and psychological principles. It also uses the wisdom of the picture language of the Tarot to interpret emotional and behavioural patterns and conditioning.* This look into the eye distinguishes between "who am I really?" and "how do I function?" Tibetan Iridology differs entirely from common iridology by using a holistic view into the causes of physical, psychological or psychosomatic symptoms. It gives you an understanding of why you suffer from certain conditions and guides you in how to overcome them. Let's have a look!

** you can find the article "what does the Tarot have to do with the nervous system?" on our website.*

You may be able to book an Eye-Reading in the shop where you find this flyer.

OR you book a session with us by email or call. The Tibetan Iridology is one of many wonderful tools we offer. Our work is designed to bring your human and spiritual potential to flowering.
